Empower™ LMS

Empower Software With Enhanced Lab Management Capabilities

Track samples through the lab as they are analyzed

Automatically sync systems for seamless connectivity

Ensure instruments are fit-for-use

Trace the execution of analysis and results with complete chain of custody

Ensure data is securely archived and available for the full retention period

Manage samples, inventory, and archive data in a singular environment

The Waters™ **Empower™ Lab Management System (LMS)** enables you to manage your data — from sample in, to data archival — all from a single dashboard for an integrated approach to your product lifecycle management.

- Data & lab management from a singular live dashboard
- Automatic inventory synchronization
- Time-based project archival
- Sample and inventory traceability through all workflows
- LAC/E and Archive Agent monitoring

Empower LMS helps your lab:

Reduce errors in transcription and increase productivity in the lab with electronic submission and sample tracking.

Increase regulatory compliance and obtain a higher level of data integrity with a single repository for all lab data and reports.

One system for CDS and LMS - one user account.

Capture and index Empower audit trails to simplify data reviews and reduce audit times.

Empower LMS Helps Lab Managers with:
- Sample Management
- Inventory Management

Empower LMS Helps Analysts with:
- Test Execution

Empower LMS Helps Quality Assurance with:
- Traceability
- Review process

Empower LMS Helps System Administrators with:
- Data Management: Manage Empower Software data life cycle
- User Management: Manage LMS users, roles, and preferences
- Via a seamless connection between Empower Software data and the LMS
