# LC-MS/MS
## CLINICAL DIAGNOSTICS

**ANALYTICAL TECHNOLOGY FOR BETTER CARE**

# Expand Your Clinical Capabilities

- Accurate and timely results ensures quality
- Automation solutions reduce manual tasks
- Customize instrumentation to analytical needs
- Maintain regulatory compliance
- Seamlessly process and integrate

## Your Analytical Goals

Our full range of workflow solutions covers all your LC-MS/MS analytical needs in the clinical laboratory – from sample preparation to service and support.
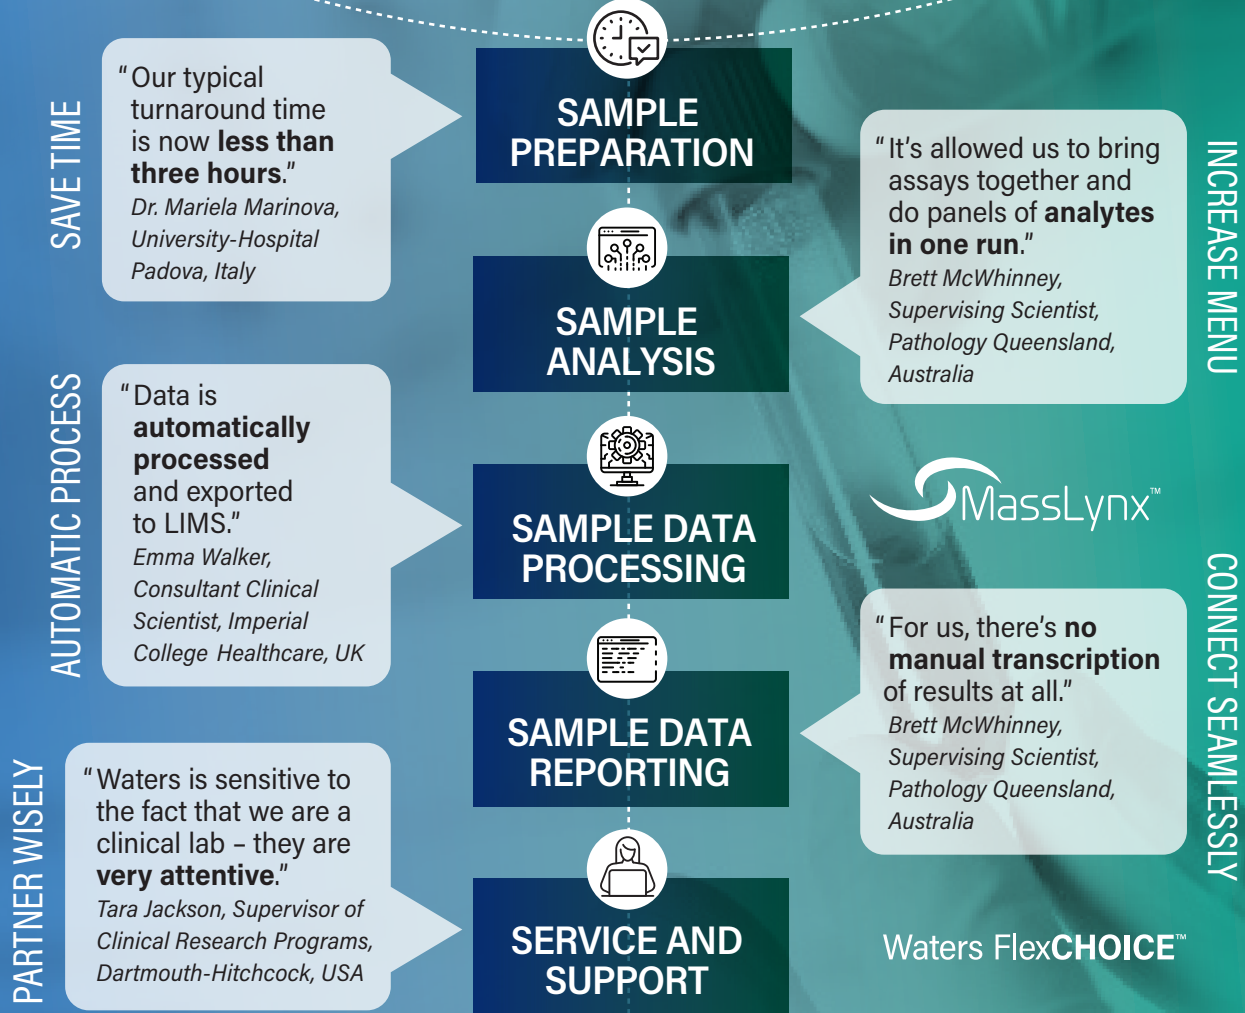

Pipette +
*easy pipetting*

Andrew +
*the pipetting robot*

- Reduce labor-intensive manual sample preparation
- Improve precision and accuracy at low concentrations
- Reliable performance of current applications
- Efficient software connectivity
- Superior service and support for your clinical applications

## MassTRAK™ SOLUTIONS Workflow

**SAVE TIME**

" Our typical turnaround time is now **less than three hours**."
*Dr. Mariela Marinova, University-Hospital Padova, Italy*

**AUTOMATIC PROCESS**

" Data is **automatically processed** and exported to LIMS."
*Emma Walker, Consultant Clinical Scientist, Imperial College Healthcare, UK*

**PARTNER WISELY**

" Waters is sensitive to the fact that we are a clinical lab – they are **very attentive**."
*Tara Jackson, Supervisor of Clinical Research Programs, Dartmouth-Hitchcock, USA*

- SAMPLE PREPARATION
- SAMPLE ANALYSIS
- SAMPLE DATA PROCESSING
- SAMPLE DATA REPORTING
- SERVICE AND SUPPORT

**INCREASE MENU**

" It's allowed us to bring assays together and do panels of **analytes in one run**."
*Brett McWhinney, Supervising Scientist, Pathology Queensland, Australia*

MassLynx™

**CONNECT SEAMLESSLY**

" For us, there's **no manual transcription** of results at all."
*Brett McWhinney, Supervising Scientist, Pathology Queensland, Australia*

Waters FlexCHOICE™

## MassTrak IVD Systems to Suit Your Needs

Routine quantification

Routine and low concentration analyte quantification

Complex trace analyte quantification

**Clinical Diagnostics is more than collecting data – you are transforming data into better care.**
