

Watrex HPLC Consumables

As an authorized distributor of VICI, IDEX and Optimize Technologies, we provide a wide range of high-quality chromatography consumables that meet the most demanding requirements for precision and reliability.

Our offer includes injection valves, adapters, tubing, filters, columns and other products that optimize the performance of your HPLC systems. Thanks to our close cooperation with partners, we guarantee the latest technology and expert advice.

Explore our range using the catalogs from individual partners (see below) and do not hesitate to contact us for a non-binding quote at watrex@watrex.com or visit our website www.watrex.com.

VICI

VICI Valco Instruments

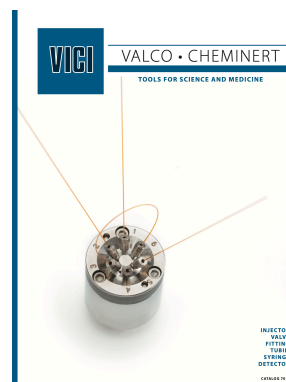

For over 50 years, VICI Valco Instruments Co. Inc. has been the leading designer and manufacturer of standard and custom valves and fittings for precision analytical, biomedical, and biocompatible instrumentation.

The offer includes, for example:

- Injectors and valves
- Fittings
- Detectors
- Valve actuation and accessories

Vici Valco product line also includes a wide range of related products such as pneumatic and electric actuators, tubing and sampling loops, heated enclosures, valve sequence and temperature controllers, gas purifiers, GC detectors, and digital interfaces.

VICI Jour

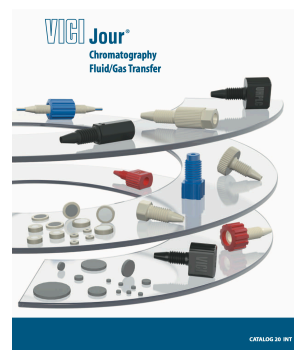

VICI Jour offer the complete Jour line of accessories and consumables for fluid transfer in HPLC and LC.

The offer includes, for example:

- Tubing (PEEK, F-polymeric, stainless steel)
- Fittings (high pressure and low pressure)
- Filters (high pressure and low pressure) and frits
- Safety products
- PEEK columns and guard columns
- Tools and LC accessories

Jour products include a complete line of tubing and capillaries in a wide variety of diameters and materials, high and low pressure fingertight fittings and connection accessories, column hardware, high and low pressure filters, cutters and other tools, solvent saver, safety caps, waste caps, backpressure regulators, and much more.

IDEX

IDEX Health & Science, LLC is a global leader in biofluidics, microfluidics and optics. It offers solutions at the level of common parts, components and system assemblies for fluidic and optical applications.

The offer includes, for example:

- Upchurch fasteners (capillaries, fittings, reducers, adapters, frits, caps)
- Manual and motorized entiles and accessories (Rheodyne, Upchurch)
- Flow control elements, back pressure regulators
- Vacuum degassers
- Empty columns and accessories

Optimize Technologies

Optimize Technologies is committed to providing the highest quality HPLC, UHPLC and LC/MS products available. They combine innovative design and superior performance to create straightforward and elegant solutions to everyday laboratory problems. They are constantly developing new products and expanding their existing offerings.

The offer includes, for example:

- Low Pressure, High Pressure and Special Fittings
- UHPLC Fittings
- Adapters
- Tubing and Tubing Cutters
- In-Line Filter, Mini Filter, Micro and Nano Filters, Steam filters and Pre-Column
- Trap Columns
