eLearning

Chromeleon CDS 7 eLearning

Duration: 4 hours

Course objectives:

This self-paced learning plan is designed for chromatographers new to the Thermo Scientific™ Chromeleon™ Chromatography Data System (CDS) software. Starting from the initial application launch, the course covers all basic aspects of Chromeleon CDS software, allowing a new user to perform all steps required to operate their chromatography system and run, process and report samples. Prior experience with Chromeleon CDS software is not required, but learners should have a working knowledge of the fundamentals of chromatography, as well as familiarity with Microsoft Windows™.

Amongst the topics covered in this 35 module eLearning series are:

- How to Launch Chromeleon CDS software
- Introduction to the Console
- Introduction to the Console, Navigation Panes and eWorkflows
- Navigation Panes
- eWorkflows
- How to use DataVaults
- How to use the Help features
- How to import data
- How to create and run sequences
- How to create basic instrument methods
- How to create processing methods
- How to create and use detection parameters
- How to use the Cobra Wizard
- Using Calibration Modes in Chromeleon CDS software
- Printing and Exporting
